

INSULATED WALL PANELS

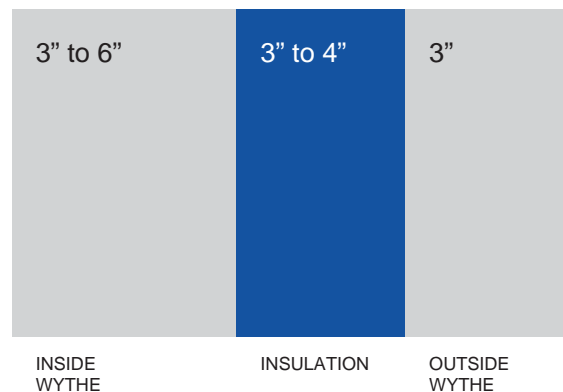

A practical choice for commercial use and data centers, our insulated wall panels can be customized based on project-specific thermal requirements and finish options making them ideal for use across a range of applications. Panels are manufactured at one of our offsite facilities and delivered for quick installation in the field, minimizing risk and site impacts.

“Through our partnership with Clark Pacific, we feel confident taking on more projects which has helped us grow our data center business. They are a consistent and reliable partner that has helped us meet our thermal requirements and schedule.” -J.T. Magen

STANDARD DETAILS AND DESIGN

- Wall panels engineered to meet desired performance
- Multiple Sealant Lines
- Insulation thickness varies depending on thermal requirements (R-value).
- Wall panels can be cladding or load bearing
- Can be used for lateral load resistance

TYPICAL PANEL

Typical R-Value Range: 15 - 25

COMMON USE
